A. Introduction

The Online Timetable project is part of a larger Deakin Timetable project where the goal is to unify the way timetabling is performed for all Deakin students, on campus or studying online.

Early notice for students

The aim is to gather the details of scheduled activities for online units early - many weeks before the teaching period commences. Details are gathered from unit chairs using a simple intuitive Online Units Timetable form.

The Search component of the Online Timetable app will be open for students to find the timetable for all their online units on the same date as the Campus Timetable is open to students. Thus giving an equitable experience for both campus and online students.

Benefits include:

- Consistent terminology is used in the app - benefitting both staff and students.
- Students can view the timetables of all their units in one view many weeks before teaching begins.
- From O-week onwards, online unit activities appear in D2L unit sites in a consistent widget for students to view.
- Student Advisors can use the app Search function to assist with student enquiries.

C. Contacts for support

For the Online Timetable app

Online_Timetable online_timetable@deakin.edu.au

For D2L Unit Site assistance

Arts and Education: ArtsEd Digital Learning artsed-digital-learning@deakin.edu.au

Business and Law: [Business and Law](#) – Learning Innovations request system

Health: hedu@deakin.edu.au

SEBE: dlf-li-sebe@deakin.edu.au

For Curriculum assistance:

Arts and Education: ArtsedCG@deakin.edu.au

Business and Law: Buslaw-curriculum@deakin.edu.au

Health: Health-curriculum@deakin.edu.au

SEBE: Sebe-curriculum@deakin.edu.au

D. General Information

1. Please enter any timetabled activities for Online units into the app, selecting whether these activities are a class, seminar etc (in line with your handbook). Please do so in time for the app opening for students to search for their online units. This is the same date as the Campus Class Timetable being available to students.
2. Use the COPY function to copy all or selected activities from a nominated teaching period and unit.
3. Completing the form allows students to find their online timetabled activities early before teaching starts, so that they can plan their work/life/study.
4. The form also creates a static timetable of online sessions as a widget in your unit site homepage, so that session times are advertised to all online students (plus campus students if you wish) in a consistent way across all unit sites.
5. Any changes that you make are instantly applied.
Students will be able to search for the unit and instantly see the updates that have been made. Updates will also appear instantly in the D2L Unit Site.

To check that your activities are displaying to students correctly:

1. In the app select the **Search Online Units** menu option and enter your teaching period and unit code
 2. Review your Unit Site homepage and the Online unit timetable should appear on the right hand side
6. You can select if you wish to allow BOTH online and campus students to view the Online Timetable widget in the Unit Site. The default is only Online students.
 7. If data is not entered or is incomplete, then nothing will show in the Search and D2L Unit Site.
 8. To delete - login to the app and delete all activities. The Search will display zero activities and the Online Timetable widget will not display at all.
 9. The timetable on your unit site will not contain links to the sessions. You will still need to advertise these on your unit sites, e.g., by notifying students through the Cloud Classroom resource folder or by linking sessions in news posts or content pages each week.
 10. Students cannot enrol in activities via the online timetable. If you want to monitor or cap allocations, you will need to do this via other mechanisms, for instance making a sign-up sheet available in week 0.

11. The timetabling tool does not yet provide clash-protection. Please keep using your existing strategies within your courses to manage this.
12. The app will remain open until the end of the teaching period.

E. FAQs

1. I cannot login to the app.
In Callista - Your unit must have an Online Offering (Unit Class = X%).
Plus you need to be the Unit Contact for the 'X' Offering.
Please contact your faculty curriculum support to correct the above.

If the above is already correct, or if you are a second unit chair for your unit,
please contact Online Timetable support – see above.
2. My unit does not appear in the selection list.
Your unit must have an Online Offering in Callista (unit class = x%).
If your unit does have an Online Offering, please contact Online Timetable support – see above.
3. I cannot enter any activity details – New/Edit Request is not available.
If only the Search function is available, then you are not the Unit Contact entered into Callista against the Unit Offering. Please contact your faculty curriculum support to correct the above.

If the above is already correct, or if you are a second unit chair for your unit,
please contact Online Timetable support – see above.
4. How do I pick a day and time?
It is up to you to choose a day and time that suits you, your staff, your campus timetable, and your students.
You can also enter your best guess and change the day and time when you are certain – the app remains open until the end of the teaching period.

You can also poll students for their preference.
Surveys: <https://dteach.deakin.edu.au/clouddeakin-guides/assessment/surveys/>
5. Does this app include Clash Protection?
The timetabling tool does not yet provide clash-protection. Please keep using your existing strategies within your courses to manage this. The Activity report has been developed which you are able to run. This report will provide you with information of other units who have scheduled online activities that clash with yours.
6. Do I create a few sessions and then settle on the most popular?
You can run a survey and view the most popular time slot if you choose.
Surveys: <https://dteach.deakin.edu.au/clouddeakin-guides/assessment/surveys/>
7. Can students self-allocate? Does this data flow though to STAR?
Students cannot enrol in activities via the online timetable. If you want to monitor or cap allocations, you will need to do this via other mechanisms, for instance making a sign-up sheet available in week 0.

The data does not currently flow through to STAR.
8. What happens if I do not populate sessions in the new app?
When the app opens to students to search for their online unit activities, students will not see any timetable activities for your unit. They may contact you or the Student Services helpdesk for assistance.

When D2L Unit Sites are open to students - nothing will show in the D2L Unit Site.
9. Can Campus students see the Online activities?

Any student can view the Online activity details in the app using the search function. However they will not be able to join the online activity unless provided with the link.

The default is that only Online students can see the Online Timetable Widget in the Unit Site when they open in O-week. You can change this by selecting 'BOTH campus and online students' in the option in the form.

10. How do I combine my Campus Online activities with my Online Student session?
Perhaps make them both the same day and time.

11. How do I add campus students to Online sessions?
For campus based overseas students or campus students with health Issues that you wish to attend your Online activities, please advise the students individually of the session details.

12. How do I separate Online students based at Burwood and Online Students based at Geelong?
You could set up 2 sessions and use the Activity label to differentiate the two sessions e.g. Seminar 1 – for Burwood based students only, Seminar 2 – for Geelong based students only.

13. What information is told to the student?
Refer to the students STAR website.

<https://www.deakin.edu.au/students/enrolment-fees-and-money/enrolments/star>

F. Campus Student Timetable web page

Provisional Campus Timetable – this is the page that is published each trimester for Campus Timetable activities.

[Class timetables \(deakin.edu.au\)](https://www.deakin.edu.au/students/enrolment-fees-and-money/enrolments/star)

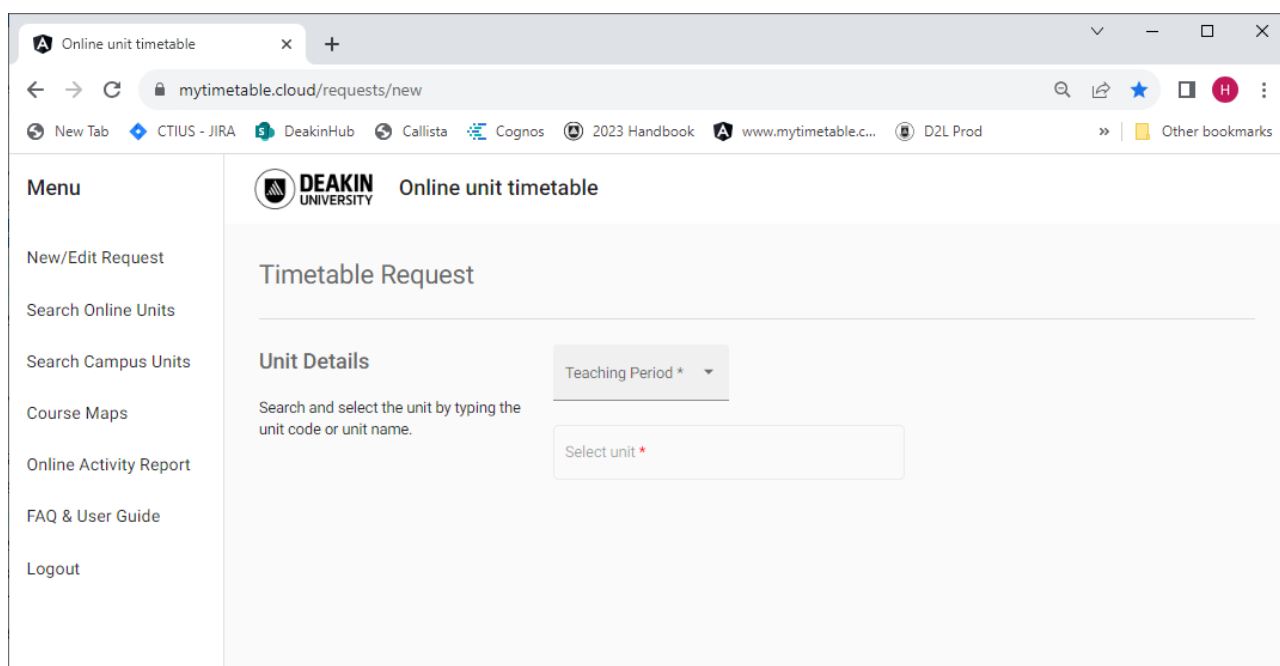

G. Course Maps web page

Course Maps – this is the page that holds Course Map information.

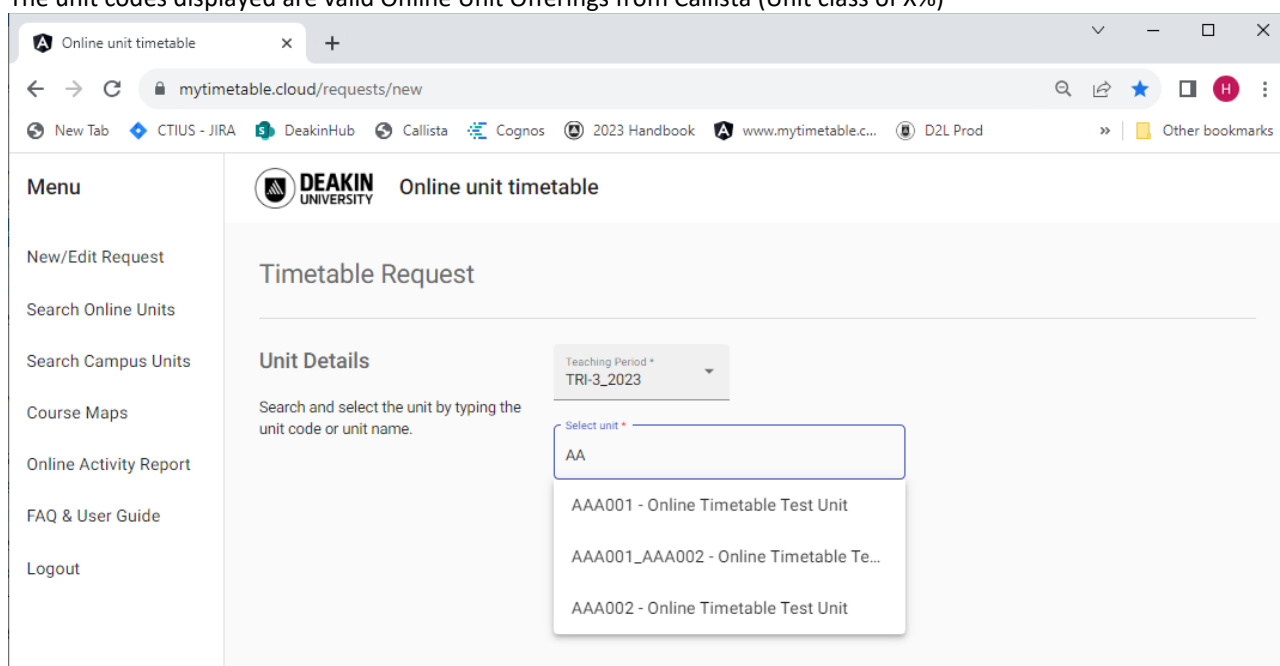

<https://www.deakin.edu.au/students/enrolment-and-fees/manage-your-course/course-maps>

H. User Instructions to begin – refer to the User Guide for full detail.

1. Login to the Online Timetable app <https://www.mytimetable.cloud/>
For access issues, please contact the Online Timetable support team as per details provided above.

2. To begin a completely new request or update a current request select **New/Edit Request**
3. Enter the Teaching Period
4. Enter the **Unit Code**
As you start typing - the list of unit codes will become smaller.
The unit codes displayed are valid Online Unit Offerings from Callista (Unit class of X%)

I. D2L Unit Site showing Online Timetable widget – Test unit with Prod D2L

The screenshot shows a web browser window with the URL `d2l.deakin.edu.au/d2l/home/1486051`. The page title is "AAA001 - Online Timetable Test Unit". The user is logged in as "Helen Billham". The navigation menu includes "Home", "Content", "Discussions", "Assessment", "Tools", and "Setup".

Announcements

Cloud timetabling info has moved
 Posted a year ago - (31 March, 2022 8:00 am)

Dear Helen,

You can now find this unit's cloud timetabling information under Content. We apologise for any inconvenience. We are aiming to restore the cloud timetabling info to the home page for Trimester 2.

DEAKIN UNIVERSITY Online unit timetable

Search for an online unit's timetable

This page will display the timetable for any online units where there is a timetable available. If your online unit doesn't have a timetable available here, you can check back again as some units are added later. You will always find the information in your unit site one week before teaching commences.

To view your online unit timetable, enter the Teaching Period, your unit/s code then 'Generate timetable'.
